DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a secondary battery wherein the concentration in mass ratio of a free acid in the electrolyte layer is 60 ppm or less, classified in class 429, subclass 188.
 - II. Claims 8-14, drawn to a secondary battery wherein the average particle diameter of the positive electrode active material lies in a range from 10-22 um, classified in class 429, subclass 209.
 - III. Claims 15-22, drawn to a secondary battery wherein the positive electrode active material layer contains 0.15 percent by weight of carbonate compound, classified in class 429, subclass 227.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and have different effects such that Invention I requires the concentration in mass ratio of a free acid in the electrolyte layer is 60 ppm or less versus Invention II requires the average particle diameter of the positive electrode active

Art Unit: 1745

material lies in a range from 10-22 um and Invention III requires the positive electrode active material layer contains 0.15 percent by weight of carbonate compound.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. David Metzger on Wednesday, February 12, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura Weiner whose telephone number is (703) 308-4396. The examiner works a flexible schedule.
